

Café Station 1™

Embrace The Final Resource
for Great Coffee

Café Station 1™

Designed for Baristas

Café Station 1™ is an adaptable and efficient system directly connected to your espresso machine. It gives you pure water enriched with Swedish minerals and your choice of TDS, all delivered with precision.

Celebrate The Journey of Coffee

Growing

In the wild terrain of coffee farming, a journey unfolds.

Roasting

Skillfully guided hands roast the beans with care and precision.

Infusing Water

Finally, you can master the often-forgotten ingredient: water.

Brew With Confidence

Water Elevating Your Coffee

Celebrate the journey of the coffee you make, with a system that adapts for the enhancement of each variety of the bean.

Purified to Perfection

The Spirit™ purifier uses our SuperiorOsmosis™ technology to purify the water up to 99.7%, removing contaminants like PFAS and microplastics.

Liquid Rock®

Our unique mineral extract made from Swedish minerals is added with precision using a mineral dosing pump. This gives you pure, adjustable and even levels of TDS.

Unlike traditional mineral filters, Liquid Rock® keeps your operations smooth and hassle-free by not creating limescale buildup.

Café Station 1™

Perfectly Brewed, Every Time

Enhance your guest experience with coffee full of thought and care.

Adapting to Your Coffee Beans

Bring out the unique flavors of your carefully chosen coffee beans, ensuring each cup is a delightful experience for your customers.

Customized by You

The system is created to let you be in charge of the water infused in your coffee, making it taste just the way you intended.

What We Offer

An easy, reliable, and adaptable system that delivers consistent coffee quality with 99.7% pure water and a stable TDS using our unique Liquid Rock® mineral blend.
