

SLAYER
ESPRESSO MACHINES

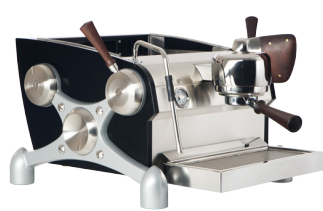

SLAYER **SINGLE**
GROUP

THE DREAM MACHINE

Whether it's the cornerstone of your cafe or the prize jewel in your kitchen, the SLAYER Espresso Single Group is unmatched in design and innovative technologies.

Fully equipped with patented needle-valve technology for ultimate flow rate control, an independent brew tank for impeccable temperature stability, and an individual tank for unlimited steam capacity. This machine won't stop until you do—steam and pull shots simultaneously and continuously without pressure drops or temperature loss. You'll have all the necessary tools to extract the best flavors from each coffee over and over again.

DESCRIPTION

The SLAYER Espresso Single Group in its Standard Configuration features silver powder-coated X's, black powder-coated rear and side body panels and actuators finished in European Ash.

The SLAYER Espresso line is massively customizable. Explore alternative finishes and wood options to make your machine unique and truly yours.

ESSENTIAL FEATURES

PATENTED NEEDLE VALVE

Espresso flavor profiles like none other by grinding finer and using a restricted water flow rate

INCREDIBLE TEMPERATURE STABILITY

Unique heating system heats up quickly, gives super consistent temperature at the group and an unrivaled steam capacity for machines in its segment

SHOT MIRROR

Watch your puck saturation with ease

INDEPENDENT BREW AND STEAM TANKS

PID-Controlled Brew Tank (1.1 liters, 600 watts) is separate from the Steam Tank (3.3 L, 1,300 W OR 2,000 W) so each can maintain optimum temperature stability

ROTARY VANE PUMP

Commercial-style pump gets to pressure fast and can draw from an external reservoir

OPTIONAL REMOVABLE DRIP TRAY

Easy collection of waste water for non-plumbed applications

BREW GROUP ACTUATORS

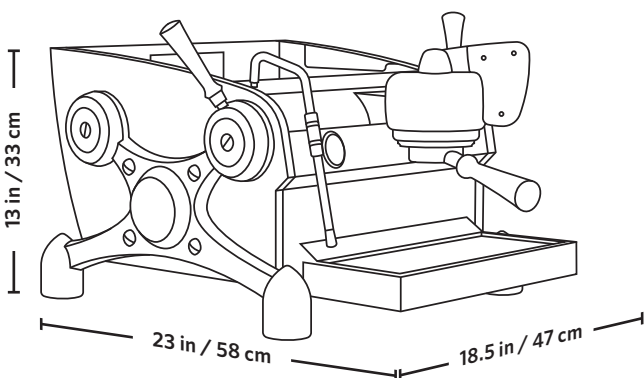

3-position actuator allows you to shift between flow rates effortlessly

HANDCRAFTED & CUSTOMIZABLE

Built with both form and function in mind—the choice is yours on wood type, panel color, metal finishes, cup rails

PROFESSIONAL GRADE TOOL

Commercial group and internal parts make this a capable tool for a business or home—this grouphead is rated at 1 million cycles

SPECIFICATIONS

Weight	110 lb / 50 kg
Brew Tank	1.1 liters, 600 watts
Steam Tank	3.3 liters, 1,300 watts or 2,000 watts
Single-Phase Power 110V Spec	120V; 60Hz; 13A; 1.6kW
Single-Phase Power 220V Spec	220—240V; 50/60Hz; 10A; 2.1—2.4kW
